

Microbiology Essentials for Botanicals and Dietary Supplements

October 8–9, 2024 | Philadelphia, PA

PRESENTED IN
PARTNERSHIP WITH

AHPA's Microbiology Essentials for Botanicals and Dietary Supplements workshop – presented in partnership with *bioMérieux* – is designed to provide a comprehensive understanding of microbiology principles relevant to the production, quality control, and safety of dietary supplements. This workshop aims to equip participants with the knowledge and skills necessary to ensure microbiological integrity throughout the supplement manufacturing process.

Key topics to be covered in the workshop:

- Introduction and overview of the microbiology of dietary supplements
- Regulatory requirements and compliance
- Advanced analytical testing methods
- Improving production through GMP and environmental monitoring

The workshop will also include case studies, hands-on activities, and opportunities for Q&A and networking.

Who should attend:

This workshop is tailored for professionals involved in the development, manufacturing, quality control, and regulatory compliance of dietary supplements, including scientists, quality assurance personnel, regulatory affairs professionals, and manufacturing managers.

Benefits of attending:

- Enhanced understanding of microbiological principles relevant to dietary supplements
- Improved ability to implement effective microbiological control measures in supplement manufacturing
- Increased awareness of regulatory requirements and best practices for ensuring product safety and quality
- Opportunities for networking and knowledge exchange with industry peers and experts

 **October 8–9, 2024**

 **Philadelphia, PA**
